

**NIMURJA**  
**(Pallet Formulation)**

**Ideal for: INM, IPM and 100% ORGANIC FARMING**

Nimurja is a concentrated pallet of neem plant part, containing highly potent bio-organic material of only neem fractions. This product is mixture like Nimbin, Nimbinin, and Nimbidin. Nimurja has been tried and certified by **INDIAN COUNCIL OF AGRICULTURE RESEARCH, NEW DELHI.**

**ADVANTAGE**

- Nimurja being 100% pure neem concentrate can be used as a soil applied bio-organic and fully biodegradable organic manure product to enhance soil condition like rectifying the soil pH, release of organic N-P-K & essential Micro & Macro nutrients, only with an effective percentage of neem oil acting as a potent insecticide, fungicide and Nematicide.
- Nimurja helps to build up of humus and increases the water holding capacity of the poor soil.
- Different type of alkaloids present in Nimurja play a distinctive role in controlling most of the harmful soil based nematodes like Root knot, lance nematode, stuby nematodes & *Rotylencoles reniformis* nematodes etc.
- As a by-product of decay, sulfonic acid, and sulfuric acid are formed, which act upon harmful nematodes.
- There is no report of any resistance developed in soil based Fungi, microbes, & nematodes while using Nimurja on long term.
- Acts as a good nitrifying agent. It helps for efficient use of urea & phosphatic fertilizer.
- Use of Nimurja prior to the sowing of crops essential to control soil based pest nematode.
- Nimurja prevents the build-up of harmful insects and nematodes. It also shortens their life.

**DOSES & APPLICATION**

- For agriculture crops (Paddy, cotton, Ground Nut, Castor, Tobacco etc.)
- 5-10 kg per acre (at the time of land preparation).
- 5-10 kg per acre after 40-45 days.

**FOR HORTICULTURE CROPS**

- Small fruit trees- 200-gm/plant in two splits pre and post monsoon.
- Large fruit trees- 400-gm/tree in two splits pre and post monsoon.
- Ornamental trees- 1-2kg/ornamental trees twice.

**Packing : 1kg and 5 kg**
